PROFESSIONAL SUMMARY

Results-driven Senior FinOps professional with 6+ years of experience optimising multi-cloud infrastructure costs and driving financial efficiency across Azure, AWS and GCP environments. Proven track record of reducing cloud spend by 33.3% through automated solutions, real-time monitoring, and cross-functional collaboration. Expert in designing and implementing FinOps frameworks from the ground up, leading cost optimisation initiatives, and building data-driven reporting that influences senior stakeholders. Strong background in financial forecasting, vendor management, and translating complex technical decisions into clear business value.

CORE COMPETENCIES

FinOps Framework Design & Governance • Multi-Cloud Cost Optimisation (Azure, AWS, GCP) • Financial Forecasting & Budget Management • Cost Allocation, Showback & Chargeback Models • Resource Right-sizing & Waste Elimination • FinOps Maturity Assessments.

Technical & Automation • Infrastructure-as-Code (IaC) Integration • Automated Dashboards (Power BI, Scripts and APIs) • Cost Anomaly Detection & Alerting • API Integration & Scripting (Python, Bash, Linux).

Leadership & Collaboration • Cross-functional Stakeholder Management • FinOps Culture & Best Practice Evangelism • Vendor Relationship Management • Technical Training & Knowledge Transfer.

Cloud Platforms & Tools • Monitoring: Apptio products, Custom Dashboards • Governance: Resource Tagging, Policy Enforcement • Azure: Cost Management, RIs & Savings Plans • AWS: Cost Explorer, Budgets, SCPs, Savings Plans • GCP: Committed Use Discounts (CUDs), Cost Management.

PROFESSIONAL EXPERIENCE

Next Retail Limited | Senior FinOps Analyst (Azure & GCP) | OCT 2025

- **Cost Optimisation & Financial Management**

Develop and implement FinOps policies, governance frameworks and maturity assessments from scratch, driving a culture of financial accountability across engineering and finance teams.

Driving significant cost-saving opportunities through strategic resource optimisation, reservations, rightsizing, workload optimisation and auto-scaling, delivering measurable ROI on cloud investments.

Owning cloud budget creation, forecasting and ongoing management, ensuring accurate cost allocation and improved budgeting processes across multiple domains.

Continuously monitoring and analysing cloud spend to identify trends, anomalies and optimisation opportunities using Azure Cost Management, Azure Advisor and custom tooling.

- **Automation, Reporting & Dashboards**

Designed and delivered the FinOps Hub (Monthly, AI and Daily Cost Dashboards), providing real-time visibility and data-driven insights for stakeholders and Domain Managers.

Leveraging scripting and Infrastructure-as-Code (PowerShell, Terraform) to automate reporting, cost monitoring and anomaly detection, significantly improving efficiency and data accuracy.

- **Governance, Maturity & Strategic Initiatives**

Led Product Tag Implementation and supported the development of showback/chargeback models to provide true cost visibility for shared infrastructure across product and domain teams.

Set KPIs and established Monthly Domain Cost Review Meetings and presented cost optimisation progress and dashboard changes directly to Domain Managers and senior leadership.

Contributing to the evaluation and business case for advanced FinOps tooling to enable more granular, proactive cost recommendations and replace existing solutions.

- **Stakeholder Management & Leadership**

Presenting cost optimisation progress and dashboard changes directly to Domain Managers and senior leadership, increasing visibility of FinOps impact across the organisation.

Collaborating closely with cloud architects, DevOps, finance, procurement and leadership teams to embed FinOps principles and influence technical and financial decision-making.

Supporting FinOps maturity assessments and continuous improvement of processes across the team.

Taylor & Eyre Limited | FinOps Engineer (AWS) | Nov 2022 – Apr 2025

- **Cost Optimization & Financial Management:** • Delivered 25% reduction in cloud waste through systematic analysis using AWS Cost Explorer, Budgets, and Cost Anomaly Detection • Developed and implemented multi-layered cost optimization strategies including EC2 right-sizing, idle resource elimination, and strategic use of AWS Savings Plans • Led financial forecasting initiatives, creating accurate quarterly and annual cloud budget projections aligned with business growth targets • Collaborated with Finance and Procurement teams to optimize contract renewals and implement consolidated billing strategies
- **Automation & Programmatic Solutions:** • Built automated Power BI dashboards providing real-time visibility into AWS spend, usage trends, and budget performance across 15+ business units • Created Python-based automated cost reporting system using AWS APIs, reducing manual reporting effort by 80% and eliminating data errors • Implemented self-service cost monitoring tools enabling development teams to track and optimize their own resource consumption • Developed automated shutdown scripts for non-production environments, achieving 30% cost reduction in dev/test infrastructure
- **Governance & Culture Building:** • Established comprehensive resource tagging policies and Service Control Policies (SCPs), improving cost allocation accuracy by 95% • Acted as FinOps evangelist, conducting training sessions for 50+ engineers and product managers on cost-conscious development practices • Embedded cost optimization principles into development lifecycle processes, creating guidelines for Infrastructure-as-Code implementations • Led quarterly cloud spend reviews with senior leadership, presenting data-driven recommendations and ROI analysis
- **Stakeholder & Vendor Management:** • Maintained strategic relationships with AWS account teams, staying current on new services, pricing models, and optimization opportunities • Facilitated cross-functional workshops between Engineering, Finance, and Operations teams to align technical decisions with financial objectives • Supported contract negotiations and vendor assessments, contributing to 15% annual savings through strategic procurement.

FBNQuest Merchant Bank | Senior Transaction Analyst | Feb 2019 – Sep 2022

- **Financial Operations & Process Optimization:** • Led team of 6 analysts in processing equity trades, achieving 99%+ error-free execution through systematic quality controls • Implemented workflow optimization strategies reducing transaction processing time by 40% while maintaining regulatory compliance • Developed automated reconciliation processes using Bloomberg and proprietary systems, improving operational efficiency • Created comprehensive financial reporting dashboards using Excel and Power BI for senior management decision-making
- **Risk Management & Compliance:** • Performed KYC/AML due diligence using World-Check, optimizing client onboarding processes by 15% • Ensured strict adherence to SEC Nigeria and MiFID II regulations, contributing to 99.9% reduction in regulatory risk exposure • Implemented systematic risk assessment protocols and compliance monitoring frameworks

Additional Experience

- **Zenith Bank PLC** | Deputy Branch Operations Manager | *Jun 2018 – Jan 2019*
- **DUFMA Integrated Agritech** | Project Manager | *Apr 2016 – Mar 2018*

EDUCATION & CERTIFICATIONS

Masters in Data Science & Analytics | Cardiff University

Bachelor of Technology in Management & Accounting | Ladoko Akintola University of Technology

Professional Certifications:

- FinOps Certified Practitioner - FinOps Foundation
- AWS Cloud Practitioner - AWS Cloud Quest
- AWS Machine Learning Foundations & Introduction to Generative AI – AWS

TECHNICAL PROFICIENCIES

Cloud Platforms: Azure (expert), AWS (expert), GCP (proficient),

FinOps Tools & Maturity: Azure Cost Management, AWS Cost Explorer, GCP Cost Management, CloudHealth, Infracost, Terraform, AWS Config, Azure Policy & experience leading business cases for advanced FinOps platforms and driving team-wide process improvements.

Analytics & Reporting: Power BI, Advanced Excel/ G. sheets, Financial Forecasting, SQL, Python Azure DevOps, GitHub Actions.

Automation: Bash Scripting, Linux, API Integration, Infrastructure-as-Code Principles

Project Management: Jira, Asana, Trello, CI/CD, Agile methodologies.
